# GO BAG MINI

PRODUCT CODE: GBM

## HYBRID GO BAG AND WAIST BAG

Designed for MARSOC medical personnel, the S.O.Tech Go Bag Mini is a distinct hybrid of the popular Go Bag and Waist Bag allowing for shoulder/back pack use and waist pack carry. When wearing body armor, the waist pack feature allows for easy front access to med kits, breaching gear, and SERE kits. The padded shoulder strap gives great stability that other waist packs lack. When used as a go bag, the Go Bag Mini can store between seats as a tubular bag and the end pull handle gives a quick and easy grab and go. After bailing out of the vehicle, the padded shoulder strap allows for easy over the neck carry on the back. Double internal (against the body) zippers allow for access and bag entry while walking or running without dismount.

## MULTI-MISSION COMPATIBILITY

The main compartment has numerous elastic loops and an internal mesh zipper pocket for gear organization. On the top of the pack there is a large zipper and Velcro® pocket for rapid access to a large bandage or tool. A slot is located on the shoulder strap for hydration reservoir tube access. MOLLE/PALS webbing is located on the padded shoulder strap for accessory pouch attachment (sold separately). Available in Coyote Brown, Black, and ACU. Custom colors available upon request. 12" x 5" x 5".
