CALLAHAN CONVERTIBLE PLATE CARRIER SYSTEM RAPIDLY CONVERTS TO SUIT EVERY SPECIAL OPS MISSION

With the help of a deploying Special Forces soldier, S.O.Tech combined its battle-proven Hellcat internal magazine slot chest harness (Patent Pending 60/508,417) with our trauma plate carrier to form the Callahan Convertible Plate Carrier System-CPCS. Complete, the system is a MOLLE/PALS covered front and back plate carrier with strapless Hellcat chest rig attached to the front plate, holding 6 M4 mags internally. For direct action missions the front and back plate carriers can be worn together with MOLLE pouches attached to the faces. For vehicle patrols, only the front plate carrier can be worn with the shoulder straps extended. For rural / long range operations, the Hellcat chest rig can be removed and worn independently with shoulder straps extended. Pouches can be added to each configuration. Other options are available as well as customization at further charge. The new Tomcat version holds M4, M14, AK, smoke and radios. This is the original, comfortable and durable SOTech design. Beware of poor imitations. See website for additional details.

HELLCAT CHEST HARNESS SYSTEM

S.O.Tech developed the internal magazine slots of the Hellcat Chest Rigs to provide more carrying capacity on a compact chest mounted platform. By moving the magazines to internal slots, we freed up the front PALS webbing either for the attachment of more magazine/gear pouches or to provide a low profile chest rig with all the magazines laying flat against the body. Our inspirations came from a project with a Ranger Regiment medic who asked us to place magazine slots behind his medical pouch to give him more real estate. We transferred this idea onto a chest harness and found the most effective way to carry rifle magazines into combat. The MK 1 is a full front. The MK 2 provides a velcro/snap center split allowing for rapid tear away without losing PALS slots. The MK 3 has a center split fastened by buckles for quick and quiet opening/closing during low crawls. The FLC combines the MK2 with the issue FLC vest to provide additional PALS points on the chest and to conform with the "GI" look. The Bib extends up onto the chest to provide additional attachments for extra gear. The Padded Shoulders come with or without a hydration pouch and add foam comfort. An internal pistol holster drops into the map pouch for cramped shooting conditions. A strong, simple and compact design built SOTech tough!
